

Product Name :
Small Extruder

Product Code :
EQMH-CHINA-MY3006007

Description :

Small Extruder

Technical Specification :

According to different requirements, variety shapes of high-grade feed pellets for fish, shrimps etc. can be produced.

The finished pellets can keep floating for 3-15 hours without pollution to water.

Small Feed Extruder Feature

According to different requirements, variety shapes of high-grade feed pellets for fish, shrimps etc. can be produced.

The finished pellets can keep floating for 3-15 hours without pollution to water.

The floating time can be controlled by the puffing degree adjustment.

Floating fish feed machine can make pellet from dia. 1.0mm-20mm just by changing the mold.

Electric heating device is adopted which can improve the feed expansion rate and pellets floating time.

High temperature and high pressure cooking process can kill the salmonellosis and bacterial infections and also makes the pellets easily to digest.

The cutting device can be adjusted to make pellets of different length.

The wet type machine needs a boiler to make steam which can conduct steam to the conditioner and ripen the raw material in advance.

Motor power	5.5-7.5KW	7.5-11KW	15KW	18.5KW
Cuting Power	400W	400W	400W	400W
Feeding Power	400W	400W	400W	400W
Production	40-50KG/ h	80-100KG/ h	120-150KG/ h	180-200KG/ h
