

Product Name :
Microwave Dryer Oven

Product Code :
EQMH-CHINA-MY3007005

Description :

Microwave Dryer Oven

Technical Specification :

The Microwave Dryer Oven is an advanced industrial system that uses microwave technology for fast, uniform, and energy-efficient drying. It features precision temperature control, automated operation, and hygienic design, making it ideal for food, pharmaceuticals, and chemicals. Compared to conventional dryers, it offers 50% faster drying, 30% energy savings, and better product quality by preventing overheating. Suitable for powders, granules, pastes, and heat-sensitive materials, this oven ensures consistent results with minimal.

Product Name	Industrial Microwave Equipment
Type	Industrial microwave drying and sterilization equipment
Input	10KW~500KW customized
Output	10KW~500KW customized
Material	304 stainless steel
Weight	Customized equipment according to specific

Capacity	
	Customized according to demand
Features	High efficiency and energy saving
After-sales service	On-site service by overseas engineers
Application scenarios	Food, chemical drying and sterilization, etc.
Function	drying, sterilization, puffing
Control system	PLC or controller
